

1 coordination, send that information out, they were
2 directed. And it was a routine basis, I wouldn't
3 repeat to them everyday, but it was established
4 that as soon as I was satisfied with the technical
5 part of it, they would send information to Pepper &
6 Corazzini. And my understanding with Pepper &
7 Corazzini and the procedure--my instruction to them
8 was to go ahead and prepare for the application.

9 Incidentally, when we went to that,
10 something I forgot is to expedite the matter
11 further, they would have sent me stack of last page
12 of the application and I would sign that, and I
13 would send it to them because I didn't want to go
14 through--the position was don't go through them
15 getting the information from Comsearch, preparing
16 their application, sending it to me. I reviewed it
17 or I sign it, send it back to them.

18 The important thing on the application is
19 that when we all saw that is the transmitter
20 locations are pretty much offset. For example, if
21 it's Normandie Court which is licensed, that
22 transmitter data is always the same. The building

1 height doesn't change. The ground elevation
2 doesn't change. Most of the information on the
3 application of the existing transmitter is you do
4 your add-on of new receiver.

5 So you basically supplement your
6 coordination, so therefore I didn't see was needed
7 to review application every time because all the
8 application are duplicate. The only thing is what
9 it supplemented to it, which was the coordination
10 of the Comsearch--I always reviewed before they
11 sent it out.

12 Therefore, I signed a stack of last page
13 of that application. I done as much as 30 or 35
14 every time because it wasn't only for the new
15 building, if it was any building that we needed
16 to--minor changes and everything which required
17 another application be filed for FCC, they would
18 have that, and the understanding was as soon as
19 Comsearch satisfied me that data is okay, he would
20 fax or send it quickly to Pepper & Corazzini, and
21 then they proceed with the filing, and they had my
22 signature. All they had to do was date it out and

1 send it out.

2 And I would at some point call them. I
3 would let them know that this building is coming to
4 them, and make sure the Comsearch is understood
5 that he's got to send all the data sheet to them.
6 And at that point I would proceed with building the
7 system.

8 Q. I'm just going to briefly show you what
9 was previously marked as Lehmkuhl Exhibit 1 and
10 have you thumb through it briefly and see if you
11 could identify this as being an application for a
12 microwave receiver site for me.

13 (Document handed to the witness, and
14 witness reviews document.)

15 MR. BEGLEITER: Just tell the witness it
16 begins at 0001 and ends 0031. Is that all right?

17 MR. WEBER: Yes.

18 MR. BEGLEITER: That's Lehmkuhl 1. And he
19 wants to know whether or not you recognize that as
20 an application.

21 THE WITNESS: Yes, that's correct.

22 BY MR. WEBER:

1 Q. Then the next question may be irrelevant.
2 On page 483, the October 5th, 1995 report, you
3 notice in the far right column there is no category
4 for license. Do you know why?

5 A. Yeah, because this installation progress
6 report, as it says, was mainly technical
7 information. It wasn't the legal part of it. It
8 was basically technical to see where we are
9 standing, where are the projects, and that was it.

10 Q. Is licensing part of the procedure of
11 where you are at in installing a building?

12 A. At the moment it is, at right now, since
13 19 April 1995, May '95.

14 Q. I'm not quite sure I understand your
15 answer, then. Was it not an issue prior to April
16 of '95?

17 A. Prior to April '95, it was the procedure
18 that Pepper & Corazzini, through the coordination
19 process, it would go to them, and the legal part of
20 it, they would take care of that.

21 But after April or May of '95, which we
22 found out some of these buildings were not the

1 Q. Was time the major factor, then, in
2 deciding to apply for an STA?

3 A. But again, that part of it--I assume it's
4 yes, but I wouldn't decide on that. But the
5 procedure was in such a way that we knew that we
6 are not going to be, again the licenses, for the
7 reason I stated before, that we need to have a
8 customer up, and they're going to be a certain
9 time.

10 And going with the Comsearch process and
11 the application to the FCC, and the contracts that
12 we had, the building has to be going up. The
13 business has to go up. So that was the way to go.
14 Legally it was decided. I didn't decide it.

15 Q. Did somebody at Liberty instruct Pepper &
16 Corazzini to apply for STAs?

17 A. If they did, I'm not aware of that.

18 Q. Did there come a time where you learned
19 that Liberty had been operating certain facilities
20 without FCC authorization?

21 A. Yes.

22 Q. And at what point did you learn this?

1 A. About April 20, end of April '95.

2 Q. How did you come to learn about this
3 knowledge?

4 A. If I remember, some of the information
5 came from Time Warner of some of these buildings
6 without authorization.

7 Q. Was it somebody at Liberty that told you
8 that they had heard it from Time Warner, or did you
9 have direct contact with Time Warner?

10 A. No. I just got--from what I recall, I got
11 something was sent, the list of the buildings and
12 they say they were. That's why I found out.

13 Q. I guess what I'm asking more specifically
14 is--I will try to be clear--did Time Warner send
15 this information directly to you?

16 A. No.

17 Q. Did somebody at Liberty convey to you that
18 Time Warner had brought up this information?

19 A. I don't exactly remember who and how, but
20 document came up to my office internally.

21 Q. And what did you do at that time?

22 A. I'm sorry?

1 into operation prior to the application being
2 filed; correct?

3 A. The dates are different. One is February,
4 one is January.

5 Q. I had asked you earlier if you were ever
6 aware of an instance where the system was in
7 operation without even an application being on
8 file, and you told me not that you know.

9 Now I have shown you an instance, and I
10 was trying to confirm that this is the first time
11 you learned that, sitting here today. The first
12 time you have been made aware of the fact.

13 MR. SPITZER: Could we go back to that
14 earlier question? Was it clear to the witness what
15 time frame you were referring to in terms of his
16 state of mind?

17 MR. WEBER: We will make it clear.

18 BY MR. WEBER:

19 Q. Sitting here today, are you aware of any
20 instance where facilities went into operation and
21 there was not even an application on file?

22 A. At the time, no.

1 Q. By "at the time, no," you mean at the time
2 that it was turned on?

3 A. No, no, no. What I'm saying is that--let
4 me think one more time because I want to answer
5 that clear.

6 At no instances did I turn any system on
7 without realizing that I was not authorized to turn
8 the system on.

9 Q. Okay. I understand that. I'm not talking
10 about at the time you turned it on. I'm talking
11 about what you know as of today.

12 Do you know today that there were
13 instances where a facility became operational
14 without the application being on file? Do you
15 understand my question now? I'm not talking about
16 what your knowledge was at the time the facility
17 became operational. What you learned later on.

18 A. Well, later on means right now after
19 during last year when we got everything together, I
20 knew that those--the number of buildings, ten, 15,
21 whatever it was in this list, I just see that based
22 on appendix--

MEMORANDUM

TO: Peter O. Price, Esq.
Behrooz Nourain
Thomas Courtney, Comsearch
1808 Correspondence File

FROM: Michael J. Lehmkuhl, Esq. 

RE: Inventory of 18 GHz Licenses Issued to Liberty Cable Co., Inc.

DATE: February 24, 1995

Attached is the latest inventory of 18 GHz stations currently licensed to Liberty Cable Co., Inc. ("Liberty"). The inventory includes four sections detailing pending applications, granted licenses, transmit location information, and the status and path information for each transmitter site.

The redesign of this inventory reflects the major changes that have occurred at the Commission within the last six months. With the exception of Lincoln Plaza, the Commission has finally consolidated the licenses around the transmit sites so that there is only one license and call sign for every transmit site. The Lincoln Plaza licenses should be consolidated within a few months. Also note that the applications that had been pending for over two years have finally been granted. Consequently, Liberty is no longer operating under any STAs.

The license status of each path is also indicated in the right margin of the general listing by either a "P" (pending) or a "G" (granted). Also, you will note the number on the left margin of the inventory. For purposes of accuracy, this number is the path number assigned by the Commission that appears on each license. Note that since the Lincoln Plaza licenses have not been consolidated, no path number is shown.

Please call me if you have any questions or comments.
